DEF tanks

Description:

These Diesel Exhaust Fluid transfer units are delivered completely ready for use. Just add the DEF and connect the battery cable to start pumping. All poly construction with stainless steel pump and components will make this DEF tank your first choice. So many benefits you really have to see it to believe it.

- Lockable poly pump cover protects the pump and filling components.
- All stainless steel pump, fasteners, auto nozzle and breather.
- Top quality polyethylene used in tank for strength and longevity.
- Complete with ample hose and high quality auto shut-off nozzle.
- Molded in handles on tank for ease of movement.
- Convenience and durability combined to make your life easier.
